Foreword

This brief handbook is designed for graduate students in the Molecular Biology, Genetics, and Biochemistry graduate program who are performing their Ph.D. thesis research in the Department of Microbiology and Molecular Genetics. We hope it will provide you with practical information that will make your research and academic endeavors both productive and enjoyable. Our Department has a long-standing tradition of "personalizing" its graduate program and designing activities that will enhance your research experience here at UCI in a way that will have a long-term, positive impact on your scientific careers. The course work offerings for students in their second year and beyond include the Thursday morning seminar series (M&MG 201 A-B-C), tutorial (M&MG 280 A-B-C), and other seminar/special topics courses. These offerings provide unique and challenging opportunities for all graduate students to give oral presentations on their own research results, as well as on selected literature topics. Such opportunities allow students to develop seminar presentation skills that are both highly polished and professional. These skills, along with the development of your research acumen and analytical abilities, will be an invaluable part of your repertoire of scientific talents. In addition to your individual development, the Department also tries to provide a collegial environment that encourages camaraderie and scientific/social interactions among students, faculty, postdocs, and staff. It is our hope that the "user-friendly" environment in the Department will allow you the freedom to develop your creative skills as a research scientist and will enable you to engage in highly productive, innovative research projects to set you off in the right directions for your scientific careers.

For those of you just joining the Department, we wish you a warm welcome and a rewarding scientific experience with us!

Rozanne M. Sandri-Goldin
Professor and Chair

Marian L. Waterman
Professor and Vice Chair

Klemens J. Hertel
Professor and Graduate Student Advisor

General Information

Upon your arrival, please come into the office with someone from your lab and introduce yourself. You will need to sign out for keys to the outside door and to the lab in which you are working. A \$20 refundable key deposit is required. A mailbox with your name on it will be assigned to you.

Your lab key opens the departmental office door to allow you to use the conference room/library after closing hours and on weekends. You may also use the typewriter in the main office and the copy and fax machines. However, we hold each individual responsible for making sure the books are back on the shelves, the copier is off, the lights are off, and the office doors are closed and locked before leaving. The staff computers, desks, and equipment in the individual cubicles are not to be disturbed. Copy cards are also available in each lab for use at the library.

If you are sending a fax, please use a laboratory code. If you are waiting for a fax, you should check the fax machine and then your mail box.

Please feel free to ask anyone of the office staff to show you how to use the equipment. The office staff are:

- | | | |
|--|--|---------|
| • Linda Pawloski, Manager Services Officer | ldpawlos@uci.edu | x 45263 |
| • Kimberly Smith-Lyons, Grants | smithkl@uci.edu | x 45261 |
| • Darlene Arrowood, Purchase Orders | darrowoo@uci.edu | x 47577 |
| • Nashaunda Williams, payroll/personnel | n.williams@uci.edu | x 45076 |
| • Michael Vo, Graduate Student Coordinator | myv@uci.edu | x 47669 |

The upstairs department darkroom equipment (room C296) has its own rules and Genevieve Tran in the Semler lab (room B214) will be happy to give you a quick course on how to use the equipment. PLEASE CALL GENEVIEVE AT X46058 TO SCHEDULE AN APPOINTMENT.

The basic rules are to respect the equipment and belongings of each lab and the office, not to use other labs' computers without asking permission from the faculty members, not to borrow anything without asking, and to clean and lock up after oneself. If there is a facilities problem such as a flood, it should be reported to the trouble service (ext. 45444). The police emergency number (911) can also be dialed for assistance.

Parking and Transportation Services provides an escort service from 6:00 a.m. to 1:00 a.m. from one place to another on campus. After 1:00 a.m., the phone transfers to the police station and the police will

then provide the escort service. The number is 824-7233. The escort service should be used if you are leaving your lab late at night.

Graduate Courses and Enrollment

Each quarter you will receive a schedule of classes. As you know, you can register through Web Reg. Enrolling in enough classes/units before the deadline is a **MUST** each quarter. You must sign up for 200, 201, and 203 every quarter. If you do not register in time you:

- will have to pay late fees,
- will not meet the IRS FICA exemption and be subject to having the 7.5% DCP and 1.45% Medicare deducted from your paycheck,
- must use the Add card procedure for late registration and fill out a late registration form justifying why you are registering late.

All students need to take the appropriate actions to ensure they are residents of the state of California by the second year. Nonresident students who need to become California residents for tuition/fee purposes must have their status changed at the Registrar's Office PRIOR to the fee payment deadline for the fall quarter. Documentation of residence will be required. Please call the Registrar's Office at extension x46124 for details. If you have further questions please see Linda Pawloski.

When your address or phone number changes, please notify both the Registrar's Office and Linda Pawloski in the Microbiology & Molecular Genetics Office.

Stipends and Health Insurance

You will continue to receive a monthly stipend and your fees will be paid. You should already be aware of your health benefits, but if you have any questions, please see Nashaunda Williams (x45076) in the main office.

Emergency loans are available through Financial Aid. The phone number for Financial Aid is x46261. The maximum amount for a short period of time without interest is \$100.00.

Seminars and Graduate Student Duties

Students in the second year may be required to be teaching assistants (usually up to three courses total, which will be determined by the CMB program). We believe this to be valuable both for the experience this offers in teaching, and in exchange for a portion of the graduate stipend. Students whose primary language is not English must take and pass the Test of Spoken English (TSE) or the TOEP (<http://e3.uci.edu/programs/esl/toep.html>) after at least one attempt at the TSE exam. Exceptions to this requirement will not be granted. A minimum score of 50 is required in order to be a teaching assistant. The TSE is given six times during the year at TOEFL test centers. See Mike Vo if this applies to you. Once you've been appointed a teaching assistantship, you should enroll in the 399 series. This will give you credit for your teaching.

The Department of Microbiology and Molecular Genetics holds a number of seminars. Two of them are the Thursday Morning Series "201", which is given by our graduate students and postdocs, and the Wednesday afternoon bi-weekly seminar given by speakers from outside the University of California, Irvine. **Attendance at both seminar series is mandatory.** The instructor of the Thursday morning seminar course, Dr. Rozanne Sandri-Goldin, must be notified if a student will miss an upcoming seminar due to teaching conflicts, travel, or illness. Student responsibilities also include making coffee for the Thursday morning seminar and shopping for the food and drinks for the Wednesday seminar reception. The Graduate Student Representative, a 3rd or 4th year student, is responsible for assigning the dates and times for these duties. The Graduate Student Representative is appointed by the Department Chairman and Graduate Advisor on a yearly basis, and as compensation, receives a personal subscription to a journal of his/her choice. For seminars other than "201," the faculty member who is hosting the speaker assigns a student host from the lab. The student host will organize a group of a total of three students or postdocs and the speaker to go to lunch. Larger numbers should receive prior approval. Funding the reception is available up front from Linda Pawloski, but receipts must be returned.

Students may also be required to prepare media for the Medical Microbiology course held annually in the Fall.

End of Second Year Pre-Advancement Meeting

Following successful completion of the Qualifying Exam at the end of your first year of graduate study, the next step toward the doctoral degree is demonstrating research progress towards the Advancement to Candidacy. All second year students are required to convene a pre-advancement committee meeting at the end of their second year (i.e. end of the spring quarter – not in the summer). The committee should consist of the PI (silent participant) and two other MMG faculty members. The purpose of this meeting is to ensure that all second year students have accomplished reasonable progress in their research during their first full year in MMG. There is no written component for this meeting. However, all students are expected to prepare a presentation (between 30-45 min) for the pre-advancement meeting. During the oral presentation the committee will discuss the research with the student. After this discussion, the committee will excuse the student from the room and evaluate the student's performance.

Advancement to Candidacy

Following successful completion of the second year of graduate study, the next step in progression toward the doctoral degree is Advancement to Candidacy. The purpose of this process is to ensure that the student has selected an appropriate topic for the dissertation and that the experimental work that has been completed or is contemplated is scientifically rigorous and likely to be completed successfully and within the normal period of graduate study (approximately 5 to 6 years).

The advancement to candidacy exam must be taken **by the end of the Spring Quarter of the third year of graduate study**. The exam committee will consist of five members. One member will be your advisor who will serve as Chair of the committee. At least one member must be faculty outside the MMG Department. Adjunct MMG faculty are not considered to be outside the department. It is important to emphasize that the *majority* of members must be MMG faculty. Prior to the exam, the student must

obtain Ph.D. Form I. The forms are available on the Web at <http://www.grad.uci.edu/forms>. Then click on "[Advancement to Candidacy - Ph.D. Degree \(Ph.D. Form I\)](#)". If you have any questions filling out the forms, Mike Vo will be happy to help you.

A written research proposal modeled after an NIH grant application must be submitted to the committee members at least **two weeks** before the oral presentation. It should include the following sections: **Specific Aims (1 page), Research Strategy (12 pages) that includes, Significance, Innovation, and Approach.** The proposal is limited to 13 pages (single-spaced, 12 point type) including embedded figures, but excluding references. During the oral presentation the committee will discuss the proposal at length with the student. After this discussion, the committee will excuse the student from the room and evaluate the student's performance. The committee will inform the student of its decision immediately after that meeting.

The Doctoral Committee is composed of at least three members from the Advancement Committee with the exception of the outside member. The chair and a majority of members should be from the department. The student may opt to retain more than three members for the Doctoral Committee. *The committee shall meet with the student no less than once a year to evaluate the student's progress and plans for future work.* To document that the student has convened a yearly committee meeting, a form (obtained from Mike Vo) must be signed by all committee members. This form is included in the student's file so that the Graduate Advisor can make sure that the student is being properly advised. Beginning in the third year, students are expected to present their research in the Thursday morning research seminar series. A convenient time to have their committee meeting is at the time of this yearly seminar. Additional meetings may be called, as necessary, by request of the student or advisor.

Dissertation Presentation

The written and oral presentation of a student's Dissertation are the criteria for receiving the Ph.D. degree. The student must meet with the Doctoral Committee and present a reasonably complete draft of the thesis and receive the approval of the Committee before scheduling the oral thesis defense. A detailed handbook is available on the Internet through <http://www.grad.uci.edu>. Go to "Current Students", then "Thesis/Dissertation" to access instructions for thesis/dissertation submission requirements. In addition to the hard copy an electronic thesis must be submitted after the defense.

When a date is arranged for the defense of the Dissertation, go to the graduate student forms page (<http://www.grad.uci.edu/forms/>) and click on "Ph.D. Form II/Signature Page - Report on Final Examination for the Ph.D. Degree". These forms, together with the signature page from the dissertation, will be signed by the Doctoral Committee at the time of the oral defense and will be submitted with the final draft of the Dissertation to the Library Archives. Students who will complete their graduate requirements within the following academic year are allowed to participate in the UC Irvine graduation ceremonies. Caps and gowns may be rented in advance from the UCI Alumni Association. Be sure to go over to the Archives at the Main Library and pick up a dissertation packet. It will have all the requirements for your thesis preparation.

Classes

Every student should enroll every quarter in:

- 200 A, B, C - credit for laboratory research [Graded, based on performance]

- 203 A, B, C - credit for organized group study based on readings, discussions, presentations given within each lab group [S/U]
- 201 A, B, C - The Thursday Morning Seminar series given by graduate students, postdocs and faculty [Graded, based on attendance]

You must have a minimum of 12 units per quarter.

At the end of the first year you will have completed all of the course requirements of the CMB program. From your second through fifth year, you are required to take one elective course per year.

You will be required to enroll in a Scientific Writing course (MMG 280) in your second year. The course will focus on scientific writing for manuscripts and grants and it is restricted to MMG graduate students. While you are required to enroll in this course your second year, TA assignments may cause a conflict with the course. If this is the case you may defer enrollment until your third year.

A list of other approved elective courses follows. If you and your advisor identify a course not on this list which you judge to be useful to your course of study, a substitution can be made with the approval of the graduate advisor.

- 1) Systems Neurobiology
- 2) Neurophysiology
- 3) Synaptic, Cellular, & Molecular Neurobiology
- 4) Molecular Immunology
- 5) Immuno-pathogenic Mechanisms of Disease (MMG 221)
- 6) Current Topics in Gene Regulation (Biochem 291)
- 7) Redox Transcriptional Factors in Health and Disease (BioChem 285)
- 8) Human Molecular Genetics (BioChem 218)
- 9) Current Problems in Genomic Analysis
- 10) Advanced Molecular Genetics (MB&B 207)
- 11) Advanced Developmental Genetics (Dev & Cell Bio 210)
- 12) Pattern Formation and Embryogenesis (Dev & Cell Bio 231C)
- 13) Molecular Pathogenesis of Viral Infection (MMG 222)
- 14) Topics in Viral Gene Expression (MB&B 205)
- 15) Cancer Biology (MB&B 217 A & B)
- 16) Signal Transduction and Growth Control (BioChem 212)
- 17) Clinical Cancer for Basic Scientists (MB&B 219)
- 18) Physical and Biophysical Chemistry
- 19) Chemical Thermodynamics
- 20) Macromolecular Structure & Function
- 21) Protein Engineering (Phy & Biophysics 242)
- 22) Concepts of Biophysics (Phy & Biophysics 204)
- 23) Physiology of Ion Channels (Phy & Biophysics 232)
- 24) Membrane and Protein Structure
- 25) Physiology of Muscular Activity
- 26) Molecular Pathophysiology (Phy & Biophysics 210)
- 27) Molecular Mechanisms of Human Disease (MMG 225)
- 28) Scientific Writing MMG 280(Required for 2nd yr students, open to other students that had conflicts)

During the second year students may also fulfill their requirements for teaching.

Graduate Students

Graduate students by laboratory:

Ruslan Aphasizhev

Alan Barbour

- Eric Lewis

Emiliana Borrelli

- Hyuna Lee

George A. Gutman

Alan L. Goldin

- Lauren Guy
- Brian Tanaka
- Eric Velazquez
- Jakhan Nguyen

G. Wesley Hatfield

Klemens Hertel

- Will Mueller
- Derrick Reynolds
- Angela Garibaldi

Anthony James

Manuela Raffatellu

- Janet Liu
- Vladimir Diaz-Ochoa

Rozanne M. Sandri-Goldin

- Mark Ou

Bert Semler

- Andrea Cathcart

- Amanda Chase
- Richard Virgen
- Eric Baggs

Yongsheng Shi

- Serena Chan

Eric Stanbridge

Ming Tan

- Eric Cheng

Marian L. Waterman

- Nathan Hoverter
- Kira Pate
- Becky Tsai
- Stephanie Sprowl

Graduate Students in the laboratories of Joint Faculty:

Hoda Anton-Culver

Michael Demetriou

- Wenhong Zhou
- Haik Mkhikian
- Lindsey Araujo

Ed Robinson

Paolo Casali

- Guideng Li
- Tonika Lam

Paolo Sassone-Corsi
